The above changes are being made to conform the claims to the claims as amended under Rule 312. A copy of Amendment Under Rule 312 and the PTO Form-271 approving the 312 Amendment are enclosed. Other changes are to correct clerical changes entered by the Printer throughout the specification, and are all supported by the record. Since the error was a Patent Office error, it is believed that the Certificate of Correction should be issued without charge to the Applicant.

Respectfully submitted,

AMENDMENTS TO THE CLAIMS:

Kindly amend claims 13 and 17, as shown below.

This listing of claims will replace all prior versions and listings of claims in the Application:

Claims 1 - 12 (cancelled)

Claim 13 (currently amended): A method for producing a thin film comprising:

providing a first substrate having a face surface;

introducing ions into the first substrate at the face surface, such that microcavities are formed in the first substrate during or after introducing the ions, wherein the microcavities define a thin film layer extending from the [[first]] face surface to the microcavities, and wherein the microcavities reside between solid bridges of the first substrate;

bonding a second substrate to the face surface of the first substrate; and

applying mechanical forces to fracture the solid bridges.

Claim 14 (previously presented): The method for producing a thin film according to claim 13, further comprising applying energy to the first substrate.

Claim 15 (previously presented): The method for producing a thin film according to claim 14, wherein applying energy comprises applying thermal energy.

Claim 16 (previously presented): The method for producing a thin film according claim 14, wherein applying energy comprises applying energy after introducing ions.

Claim 17 (currently amended): A method for producing a thin film comprising:

providing a first substrate having a face surface;

introducing ions into the first substrate at the face surface and forming microcavities in the first substrate, wherein the microcavities define a thin film layer extending from the [[first]]

face surface to the microcavities, and wherein the microcavities reside between solid bridges of the first substrate;

bonding a second substrate to the face surface of the first substrate; and

applying mechanical forces to fracture the solid bridges.

Claim 18 (previously presented): The method for producing a thin film according to claim 17, further comprising applying energy to the first substrate.

Claim 19 (previously presented): The method for producing a thin film according to claim 17, wherein applying energy comprises applying thermal energy.

Claim 20 (previously presented): The method for producing a thin film according to claim 17, wherein applying energy comprises applying energy after introducing ions.

COMMENTS ON STATEMENT OF REASONS FOR
ALLOWANCE AND REMARKS

Claims 13 and 17 have been amended to correct minor typographical errors. No new issues have been raised which would require further search or consideration by the Examiner.

Applicants note that the Examiner has stated that the pending claims are allowable, in part, in view of the reasons for allowance set forth in their parent application serial no. 09/777,516. Applicants assert that their instant claims recite different subject matter from the claims in their parent application. For example, in the instant claims, the ions introduced into the first substrate are not limited to a particular ionic species. Accordingly, Applicants assert that their instant claims are allowable over the prior art in view of the recited subject matter and are independently patentable over the claims of their parent application.

In the event there are any fee deficiencies or additional fees are payable, please charge them (or credit any overpayment) to our Deposit Account Number 08-1391.
